Profile

Final-year Artificial Intelligence and Machine Learning student with hands-on experience in Computer Vision, Machine Learning, and Full-Stack Development. Built and deployed AI-driven applications for real-world use cases including classroom attentiveness analysis, predictive maintenance, and police monitoring systems. JLPT N5 certified with a strong interest in Japanese language and technology-driven opportunities in global environments.

Skills

Languages: Python, C++ , Java, JavaScript

Frameworks: ReactJS, Next.js, Streamlit, HTML, CSS, REST APIs

AI/ML: Computer Vision, YOLOv8, InsightFace, Deep Learning, Random Forest, K-Means, ARIMA

Database/Tools: Git, MongoDB, Firebase, MySQL, TensorRT, Power BI, Tableau

Experience

Trainee Machine Learning Engineer Intern | Invention Technologies LLP Feb 2026 – May 2026

- Worked on predictive machine failure analysis using ML models and real-time monitoring systems.
- Built Personal Financial Behavior Analyzer using Random Forest, K-Means clustering and ARIMA forecasting.
- Developed full-stack AI applications with Streamlit, MySQL and Python.
- Worked on model integration, data preprocessing and deployment workflows.

Projects

Real-Time Classroom Attentiveness & Automated Attendance

- Built real-time CV pipeline using YOLOv8 and InsightFace for multi-face recognition.
- Optimized inference using TensorRT and CUDA for low latency processing.
- Implemented cosine similarity matching and temporal smoothing for identity stability.
- Designed attentiveness scoring using eye detection and behavior analysis.

Police Bandobast Monitoring & Geo-Fencing System

- Developed live monitoring dashboard used by police officers during field deployment.
- Built geo-fencing for static zones and moving patrol routes.
- Enabled real-time staff tracking through Smart City Control Room integration.
- Deployed during major public event operations.

Machine Failure Prediction System

- Developed ML-based predictive maintenance application for industrial machines.
- Built interactive Streamlit interface for real-time failure prediction.
- Integrated probability analysis and feature-based machine health assessment.

Education

B.E Artificial Intelligence and Machine Learning

2022–2026

PES Institute of Technology and Management, Shivamogga

CGPA: 7.2

Certifications

JLPT N5 – Passed

Achievements

- Received Appreciation Letter from Shivamogga District Police for contribution to deployed monitoring system.
- Conducted Next.js Bootcamp for PESITM students.
- Participated in national-level hackathons.
